

Committed to American-Made Products

# BABA COMPLIANT MANUFACTURER

## A Commitment To Quality And Sustainability

We are excited to offer a wide selection of **BABA compliant products**, aligning with our commitment to high-quality, American-made craftsmanship.

Nearly all of our standard product offerings meet the rigorous BABA criteria, meaning they are manufactured in the USA, with over 55% of their components sourced domestically. At our facility on the California coast, we not only **design and craft our innovative lighting solutions** but also partner with local suppliers — **90% of whom are within 10 miles** — ensuring efficiency and supporting the local economy.

For more details on our BABA compliance and to request our compliance letter, please get in touch with our factory.
